**Andrew Chew Interactive Launches Squirreled™ Division Math Game**  
Squirreled™ combines learning with fun!

**(SANTA CRUZ, CA, December 19, 2013)** – Andrew Chew Interactive has launched Squirreled™ Division, the second app in the Squirreled™ math game series for the iPhone and iPad to high praise!

A review just released by iHeartThisApp.com wonderfully describes the game and recommends Squirreled™ Division as **“a fun math game for everyone!”**

**Excerpts from the review:**

“Squirreled Division math game combines learning with fun! The app is stuffed with a beautifully-designed terrain, great sound effects, and simple game play designed for the whole family.”

“Squirrel collects acorns to survive in this winter setting. It’s fast-paced game using elementary division as a tool to pass through levels. The player is tasked to crack numbered acorns by tapping them according to the equivalent divisor to split them down to the number on the bins. The bins bearing should be filled up before the time runs out to unlock the next level.”

**What iHeartThisApp Liked:**

“The game is fast-paced and never boring! It reinforces one’s knowledge on division which is a total plus! As a parent, the environment is child-friendly so it’s enjoyable to pass time with the entire family. It’s fun without any sign of violence.”
